Of notable interest in the operation of the utility, was the installation of equipment for the purpose of treating the water at the source of supply to improve the pH.

This chemistry term is used to express the balance between acidity and alkalinity with a scale reading from 0 to 14, with 7 indicating neutrality.

Previous analysis by the State Board of Health indicated the pH in our water supply as ranging from 6.1 to 6.4. With the present treatment density of about 8 parts per million, the most recent analysis made by the State Board of Health shows the pH at 7.3, giving us a vastly improved supply of water from a standpoint of turbidity in our mains and corrosion in our services.

This coming year we will be involved in relocating a portion of our 8" main between the source of supply and the general area served. It appears that considerable change in grade will result with the new highway construction, and the participation by the State Highway Department in the cost of relocating our mains is negligible.

JOHN C. BENNETT,
HAROLD G. REED,

PUBLIC HEALTH REPORT

The following is a report of the activities of the N.H. Department of Health, Bureau of Public Health Nursing, for the year January, 1960 to January, 1961.

Jan. 26, 1960 a Salk vaccine clinic was held at the high school auditorium. This clinic was attended by 699 children and adults from Bristol and surrounding communities.

This was the fourth or "booster" shot for the children and the third for adults. Due to the fine cooperation of the I.P.C. the employees were allowed time to come to the clinic for their shots of Salk vaccine. The nurse was assisted by the Bristol Woman's Club and the school nurse. Doctor Greenan administered the vaccine.

Bristol is to be congratulated on the formation of the Newfound Area Nursing Assoc. and the employment of a nurse to take over the program. The Department of Health assisted the committee when possible and was represented at several meetings of the local organizations, stressing advantages of the program.

The work of the tuberculosis program is now covered by the health nurse. Local physicians and nurses are notified when chest clinics are held at Plymouth and referrals are welcome. Reports of findings are sent to the physician and patients attending.

I would like to express my thanks to Doctor Greenan, the school nurse and other school officials, members of the Woman's Club, the local press and others assisting in promoting the program for good health in Bristol.

Respectfully submitted,

(Mrs.) LOIS B. REED, R.N.,

N.H. Dept. of Health

REPORT OF MUNICIPAL COURT

The number of complaints entered in the Municipal Court of Bristol in 1960 was 246, as compared with 269 in 1959. 211 of the complaints, or 85.35%, were for motor vehicle violations, 9 were fish and game cases, and one was a boating violation. One felony charge was bound over to the Superior Court. Also, 2 civil actions and 24 small claims were disposed of.

While there were a few more speeding violations in 1960 than in 1959, and the dangerous action of crossing solid traffic lines increased from 30 in 1959 to 46 in 1960, it is an encouraging trend to have convictions for driving while intoxicated drop from 10 in 1959 to 3 in 1960.

An analysis of 1960 cases shows that 114 complaints, or 46.34% of the total, were filed against New Hampshire residents, while charges against Massachusetts residents made up most of the balance.

The indications are that this region continues to have efficient police protection.

A summary of court receipts and expenses for 1960 shows:

Fines and forfeits collected	\$3,360.00
Less State's share	1,854.00
	<hr/>
Town's share	\$1,506.00
Town's share of small claim and other fees	7.75
	<hr/>
	\$1,513.75
Les's Court expenses	70.28
	<hr/>
Amount turned over to Town of Bristol	\$1,443.47

FIRE WARDEN'S REPORT

PREVENTION IS YOUR BUSINESS

Carelessness, *human carelessness*, causes 9 out of 10 forest fires. Each year 200,000 fires burn over 30 million acres in the United States. This represents 5 percent of our nation's woodlands being wasted each year. Every fire takes its toll. Floods follow ; stream flow is affected ; timber, buildings, grazing and wildlife are destroyed - all because *many* are *careless* with fire in and near woodland. This can be remedied. *You* can put an end to this shameful waste ! *Prevention* is *your* business !

You, whether *you* be a farmer, homemaker, business or professional man or woman, municipal, state or federal official, clerk or woodsman can play an important part in the continuing and vital prevention program.

First - by setting a good example *yourself*-being sensible and complying with the necessary laws and regulations governing the use of fire in and near woodlands.

Second - by using *your* individual influence in your community and valued council with others in insisting and encouraging them to do likewise.

1. Before burning, secure a permit from your local forest fire warden - the law requires it.

2. Be sure to properly supervise your burning - don't leave it.

3. Make certain your fire, camp or debris, is *dead out* before leaving it.

4. Don't throw down lighted matches, cigars and cigarettes or from moving vehicles - make sure they are out - use your ash tray.

Number of local fires, 0; number of acres burned, 0; number of permits issued, 49.

GERALD S. GROSS
District Chief

CHARLES G. POWDEN
Forest Fire Warden
